Data: National Historic Landmarks

- 2,596 across the United States by state (59 in Illinois)
- "Designed to recognize and honor the nation's cultural and historical heritage" (link)
- Diverse image type

[1] 💠	Landmark name •	lmage	Date designated ^[2] ◆	Location +	County +
1	Robert S. Abbott House		December 8, 1976 (#76000686윤)	Chicago 41°48'29"N 87°36'58"W	Cook
2	Adler Planetarium	More images	February 27, 1987 (#87000819@)	Chicago 41°51′59″N 87°36′27″W	Cook
3	Auditorium Building	More images	May 15, 1975 (#70000230₺)	Chicago 41°52'33"N 87°37'28"W	Cook

Scraping images from Google Image search

- List by state with description from Wikipedia
- Download images from Google Image search (as many as possible)
- Training data and testing data
- Possible issue with request limit from Google Images

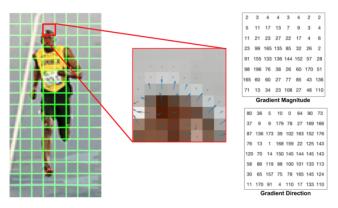

Goal

- Detection of object
- Invariant to lighting variation
- Recognition of landmarks

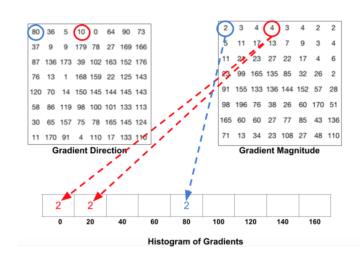

Solution

- Histogram of oriented gradients (HOG)
- Normalize
- SVM

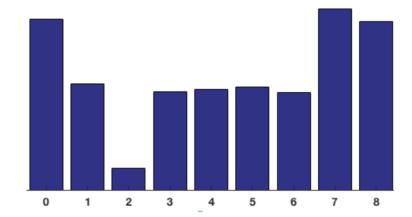

Center : The RGB patch and gradients represented using arrows. Right : The gradients in the same patch represented as numbers

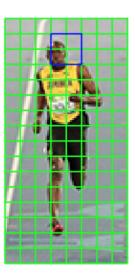

Solution

- Histogram of oriented gradients (HOG)
- Normalize
- SVM

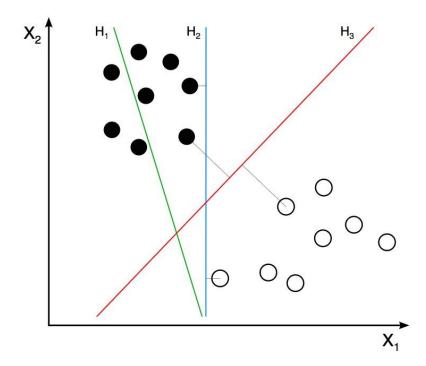

Solution

- Histogram of oriented gradients (HOG)
- Normalize
- SVM

User Product: Think you know your state?

- Can you beat the algorithm?
- Potential to use platform to train new datasets

Similar example:

Quiz: How Well Do You Know Our Solar System?

By SPACE.com Staff | August 2, 2011 10:22am ET

f 428

y 9

c 2. How much would a 150-pound person weigh on Mars?

| 57 pounds
| 174 pounds
| 102 pounds
